Check our capability at www.catana.aero

On our website you will find an overview of our capabilities. Besides generic information there is a specific search engine where you can search by tool, CMM, component or application. You will be able to see all tooling required for a specific CMM or component and the tooling that we can provide. Specific tool information is also available.

Customers who have bought tools from CATANA have access to detailed information such as revision data, user instructions, project status and down loadable technical data sheets and tool drawings.

YOUR TOOLING SPECIALIST

Besides tooling, proper training is essential when you want to expand your capabilities. We have access to engineers who have many years of hands-on experience as flight mechanic that can help you with your training requirements. They can train you at your facilities or support you on a case-to-case basis as part of a support agreement.

about catana

CATANA is a company founded in 2005 and designs and manufactures tooling for aircraft maintenance. Our customers are MRO's and component shops who are looking to extend their maintenance capabilities or to improve existing tooling. CATANA aims to provide you with a complete set of tooling at affordable cost.

CATANA can source tooling for you in the market, but in many cases CATANA will design tooling for a particular CMM or application. CATANA is keen on incorporating user experience and best practices to continuously improve our tooling designs. We don't stop after shipping the tool. We want you to be completely satisfied when using our tools. With the tooling that we supply we provide our customers with a detailed user instruction.

engineering

CATANA has extensive experience in tool design and is using sophisticated tools and materials in engineering and production to realize the best designs at affordable cost. We work with engineers that have over 20 years of experience in designing tools for aerospace. Tools that are used in repair and overhaul as well as in production. Any tooling problem that you might have can be resolved by our team!

tooling. Just a sample: * seal installation tools

- * electronic test boxes

Each tool is provided with a technical datasheet which tells the user for which applications the tool can be used and how it must be applied. The Technical Datasheet can also be downloaded from our website.

manufacturing

CATANA works with specialized tooling manufacturers who have state-of-the-art equipment and produce tooling and parts for the automotive, semiconductor and aerospace industry in Europe.

The range of tools that we can supply is extensive and in our current portfolio you will find primarily mechanical or electro-mechanical

* torque adapters and wrenches * extractors and installation tooling * disassembly and assembly fixtures

* test fixtures and test blocks

In case tools are produced by CATANA the tools are clearly marked with the CATANA toolnumber and the OEM reference. Toolsets with multiple parts have each part numbered separately for easy reference.
